## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

2. Group I, claim(s) 1-7, drawn to a fluid suction reservoir comprising a flexible bag, two plates for supporting the bag and a spring put between the two plates.

3. Group II, claim(s) 8-18, drawn to a fluid suction reservoir comprising a bag element having a fluid collection port, and first and second plates arranged in the bag element so as to face each other.

4. Where the group of inventions is claimed in one and the same international application, the requirement for unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among the inventions involving one or more of the same or corresponding special technical features. The expression **“special technical features”** shall mean those technical features that define a contribution which each of the claimed inventions considered as a whole, **makes over the prior art.** The inventions listed as Groups I and II do not relate to a single general inventive

concept under PCT rule 13.1 because, under PCT Rule 13.2, although they share the special technical feature, this special technical feature does not define a contribution over the prior art for the following reasons:

5. Blake et al. (US Patent 4,429,693) discloses a pre-evacuated flexible reservoir (col. 2, lines 21-29), comprising a flexible bag (col. 6, lines 47-60 and Figs. 2, 7, bag 40), with two plates for supporting the bag (cols. 5-6, lines 67-5 and Figs. 1 and 7, articulated plates 10a and 10b), and a spring put between the plates (cols. 5-6, lines 67-5 and Figs. 1 and 7, spring 14 between plates 10a and 10b). Therefore, the limitation of a flexible bag with two plates for supporting the bag and a spring put between the plates does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore the restriction is appropriate.

6. A telephone call was made to Mr. Robert Weilacher on 09 June 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tatyana Zalukaeva can be reached on 571-272-1115. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
